

## Job Description

<b>Job Title:</b>	Trainee Fire Suppression Installer/Maintainer	<b>Position Reports to:</b>	Operations Director
<b>Based at:</b>	Based from home, (we are urgently seeking someone based in the Rutland, South Lincs or North Cambs/Northants area to team up with one of our existing installers based in Stamford) but covering the UK as required by the company.		

### Job Purpose Summary

Are you ready for a challenge and do you relish the opportunity to work for a dynamic, professional and rapidly expanding company? Here's your chance!

Cannon Fire Protection Ltd is a specialist fire suppression company who work on behalf of a variety of both fire and FM companies, and many of the UK's diverse Restaurant, leisure and Hotel brands. We install and maintain Ansul R102 systems, have a look at their website - <https://www.ansul.com/en/us/pages/ProductDetail.aspx?productdetail=R-102+Restaurant+Fire+Suppression+System> into a wide range of premises, from Chippy's, Cafes, canteens and takeaways, to Michelin Starred restaurants, Hotels, conference centres and stadiums...pretty much anywhere there is a commercial kitchen where the cooking processes create grease laden vapours. Occasionally due to equipment failure, user error or sparks, fires can start and become highly destructive in a very short space of time, however, an Ansul system will operate quickly and efficiently and avert a disaster. These systems are installed by choice, but are a standard piece of equipment in all Wetherspoon's, McDonald's, Burger King's, KFC, Nando's, Prezzo, Beefeater, Premier Inn, Carluccio's, Morrisons and dozens of other high street brands. You'll get to go to some fantastically interesting places, and get behind the scenes of some iconic and historical venues, whilst receiving constant on the job training and working towards industry related qualifications. Performance & salary reviews will take place regularly and for the right candidate, the rewards and benefits will be attractive, resulting in being a fully qualified Ansul R102 installer, who will likely progress onto installing other types of fire suppression, such as water mist and gas suppression. The hours of work can differ greatly one week to the next, often we have to install overnight. We guarantee 40 hours, but overtime is readily available due to the type of works we undertake.

### Key Responsibilities & Accountabilities

- To assist installing fire systems into commercial kitchens
- Assist with repair works and modifications
- Stock Control
- Attending Site Surveys to assist with planning of systems
- Selecting Materials
- Assist with System Design calculations
- Share with transportation of manpower and equipment
